TAMAR TRIAL 1987

As some competitors will already know the provisional results published for this event contained some errors. These exclusively concerned the car competitors and, in the main, centred around the apparent non-appearance of several vehicles at Section 10 - Webworthy.

We have decided therefore to delete this section from the results and have, after discussions with Marshalls and Officials, amended one or two results recorded at other sections.

We are now satisfied that the most accurate record possible of this event has been achieved and this (Cars only) is shown overleaf. Special Test times have also been amended to show "Slowest time in class + 10 seconds" where failure occurred.

Since scores were generally low these changes do affect the previously announced Award Winners and we hope they will understand that, as an ACTC and ASWMC Championship round, we feel it essential that an accurate record of individual performance is achieved.

Finally we must once again thank all those Marshalls and Officials who carried out their duties in intolerable weather conditions.

LAUNCESTON & NORTH CORNWALL MOTOR CLUB LTD.

18.10.87.

41st. TAMAR CLASSIC RELIABILITY TRIAL.

R O U T E .

Abbreviations. DP = Direction Post, (Sign Post), S.O. = Straight On, L = Left,
